To whom it may concern

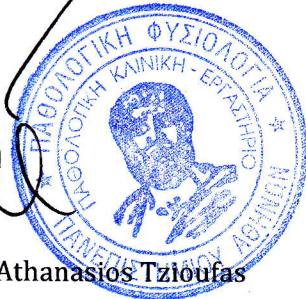

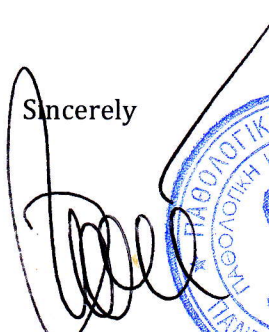

Athens 20 July 2017

With this letter I would like to confirm that the Department of Pathophysiology of the National and Kapodistrian University of Athens, together with the Institute of Autoimmune Systemic and Neurological Disorders, employed PCO CONVIN to organize the 6th Summer School of Immunology that took place in Porto Heli, Greece on 22 to 26 May 2017.

PCO CONVIN is a long standing collaborator of Department and they handled the whole process with the utmost professionalism and efficiency. PCO CONVIN is characterized by enthusiasm for the job, their willingness to go the extra mile to satisfy client needs and their hard work ethos. This is achieved by their excellent staff, who are kind, friendly and responsible. The overall experience in cooperating with PCO CONVIN was once again very positive and all activities and services were completed on time and were of the anticipated quality.

I personally, and on behalf of the School organizing committee, have no hesitation to recommend PCO CONVIN as a high quality conference organizing firm.

Sincerely

Professor Athanasios Tzioufas
